*Regulatory Toxicology in  
the European Union* Tim  
Marrs 2018-02-26

Consumer and  
environmental protection  
depend on the careful  
regulation of all  
classes of chemicals.  
Toxicology is the key  
science used to evaluate  
safety and so underpins  
regulatory decisions on  
chemicals. With the  
growing body of EU  
legislation involved in  
chemical regulation,  
there is a concomitant  
need to understand the  
toxicological principles  
underlying safety  
assessments. *Regulatory  
Toxicology in the  
European Union* is the  
first book to cover

regulatory toxicology specifically in Europe. It addresses the need for a wider understanding of the principles of regulatory toxicology and their application and presents the relationship between toxicology and legislative processes in regulating chemical commodities across Europe. This title has a broad scope, covering historical and current chemical regulation in Europe, the role of European agencies and institutions, and also the use of toxicology data for important classes of chemicals, including human and veterinary medicines, animal feed and food additives, biocides, pesticides and nanomaterials. This book is therefore extremely pertinent and timely in the toxicology field at present. This book is an essential reference for

regulatory authorities, industrialists, academics, undergraduates and postgraduates working within safety and hazards, toxicology, the biological sciences, and the medicinal and pharmaceutical sciences across the European Union.
