**Drug Violence in Mexico** Calderón Laura 2018-04-11 This is an annual study on organized crime and violence in Mexico. As in previous years, this report compiles the latest available data and analysis to evaluate trends related to drug trafficking and organized crime in Mexico.

**The Historical Foundations of the Narcotic Drug Control Regime** 2008 Abstract: This paper outlines the institutional history of the international narcotic drug control regime. It details the evolution of the control system, from its foundations at the beginning of the twentieth century - a period of mass, unregulated narcotic drug use - to the current period. The paper argues that the contemporary control model is ill-positioned to address the dynamic and rapidly changing nature of the global narcotics trade. The persistence of anachronistic guiding first principles, specifically the utopian idea of prohibition, is identified as the key impediment to the adoption of a more humane and effective policy approach. But while there is growing pressure for a revision of founding ideas, this is not supported by a host of powerful actors that includes the United States.

**Psychosocial Approaches to Peace-Building in Colombia** Stella Sacipa-Rodriguez 2014-03-24 This edited volume summarizes the work of a research group, called Social Bonds and Cultures of Peace that accompanies and supports victims of socio-political violence in Columbia. The individual chapters focus on the ongoing violence in the Colombian context, a complex and dynamic area in which various groups (drug traffickers, national armed forces, guerrilla fighters, self-defence groups) have been engaged in organized violence for more than 60 years. Emphasis is placed on the psychological consequences of violence and various forms of psychosocial support that psychologists have been providing to the victims of violence. Central to their work is the notion of "accompanying" those who have been victims of violence, listening to them, engaging them in dialogue and working together to strengthen the resources of victims. The recovery of individual and collective memories of atrocities is discussed as an important avenue for healing and for the empowerment of individuals and groups. The solidarity among victims creates opportunities at the grassroots level to pursue truth, reveal perpetrators of violence, seek public acknowledgment and attain social justice. For perpetrators of violence and members of armed groups, the book addresses a host of psychosocial issues related to disarming, demobilizing and reintegrating former combatants, including children, into society. Throughout the book, in the spirit of peace psychology, the researchers are engaged in a form of praxis that is cognizant of the wider geohistorical context within which victims and perpetrators are embedded and the dialectical relationship between micro and macro-level events and change. Researchers in Latin American studies, peace psychology, social justice and transitional justice, will find this volume to be an excellent resource.

**Human Enhancement Drugs** Katinka van de Ven 2019-07-02 Despite increasing interest in the use of human enhancement drugs (HEDs), our understanding of this phenomenon and the regulatory framework used to address it has lagged behind. Encompassing public health, epidemiology, neuroethics, sport science, criminology, and sociology, this book brings together a broad spectrum of scholarly insights and research expertise from leading authorities to examine key international issues in the field of HEDs. As "traditional" and other "new" drug markets have occupied much of the academic attention, there has been a lack of scholarly focus on human enhancement drugs. This book provides readers with a much-needed understanding of the illicit drug market of HEDs. The authors, from a variety of cultural contexts, disciplines and perspectives, include both academics and practitioners. Topics explored in this collection amongst others include: • The anti-doping industry and performance and image enhancing drugs • Steroids and gender • The use of cognitive enhancing drugs in academia • The use of sunless synthetic tanning products • The (online) trade of HEDs • Regulations of the enhancement drugs market This collection will serve as a reference for students, academics, practitioners, law enforcement and others working in this area to reflect on the current state of research and consider future priorities. This detailed exploration will provide a valuable knowledge base for those interested in human enhancement drugs, while also promoting critical discussion.

**Fear at the Edge** Juan E. Corradi 1992-12 "A genuinely interdisciplinary work . . . the best attempt I have ever seen at a truly unified intellectuals' approach to an important issue."—Timothy Wickham-Crowley, Georgetown University "Very seldom does a collected volume achieve the academic quality and internal coherence that one sees in this case. It is a major contribution to comparative research on post-authoritarian situations."—Carlos Waisman, University of California, San Diego

**Lobbying** Mark Fagan 2015-01 Lobbying: Business, Law and Public Policy, Why and How 12,000 People Spend \$3+ Billion Impacting Our Government provides students, practitioners and engaged citizens with an understanding of this highly charged aspect of American democracy. Mention the words "lobbying" or "lobbyist" to a friend or colleague and you will likely get a strong response. Some people view lobbying as nothing more than the practice of buying influence, power and legislation. To others, lobbying plays a vital part in our policymaking process, enabling us to exercise one of our most treasured constitutional rights - the right to petition the government. In reality, both positions have merit and that is what makes lobbying such an interesting practice. Lobbying is a multibillion-dollar industry that impacts all aspects of public policy at the highest level of government. At the same time, it is also the avenue by which

the average citizen meets with their government representatives to request action. Lobbying is inherently a multi-disciplinary topic. Effective lobbying requires understanding the political and policymaking process. It is also a function of human psychology and strategy consulting. Many lobbyists have a legal background, which enables them to draft and dissect legislation and make meaningful recommendations, but some are former politicians, businessmen and communications specialists. Lastly, lobbying requires business acumen, drawing on skills such as networking, consulting and public relations. While these disciplines can be looked at separately, lobbying requires the study of all of them together. The goal of this book is to take the mystery and hyperbole out of lobbying and explain the business, law and public policy aspects of the field. By the last page you will understand and appreciate (1) the history of lobbying from King Solomon to the present day; (2) the business of lobbying; (3) the laws, regulations and ethics that accompany lobbying; (4) the art and science of effective lobbying; and (5) the differences in lobbying worldwide. This book can be used for a stand-alone course on lobbying and advocacy or as a supplementary text for courses on government, policymaking, ethics and regulation. It is also a useful guide for citizens who want to impact public policy. Mark Fagan is Adjunct Lecturer in Public Policy at Harvard Kennedy School, Harvard University and a founding partner of the strategy consulting firm Norbridge.

**Reconciliation, Justice, and Coexistence** Mohammed Abu-Nimer 2001 Since the end of the Cold War several political agreements have been signed in attempts to resolve longstanding conflicts in such volatile regions as Northern Ireland, Israel-Palestine, South Africa, and Rwanda. This is the first comprehensive volume that examines reconciliation, justice, and coexistence in the post-settlement context from the levels of both theory and practice. Mohammed Abu-Nimer has brought together scholars and practitioners who discuss questions such as: Do truth commissions work? What are the necessary conditions for reconciliation? Can political agreements bring reconciliation? How can indigenous approaches be utilized in the process of reconciliation? In addition to enhancing the developing field of peacebuilding by engaging new research questions, this book will give lessons and insights to policy makers and anyone interested in post-settlement issues.

**Los Géneros Poéticos Del Siglo de Oro** Holloway Anne Cacho Casal Rodrigo 2013-08-15 This collection of seventeen essays on Spanish Golden Age and Spanish American Colonial Poetry unites contributions from a cross-section of specialists in the field of Hispanic poetry. It places aesthetic questions in their broader European context, and looks beyond the confines of Europe to interrogate the key terms of its title, balancing panoramic approaches to questions of genre with the insights afforded by detailed readings of individual texts.

**Enforced Disappearance in International Law** Lisa Ott 2011 This book explores the international legal framework governing the crime and human rights violation of enforced disappearance. It includes a thorough analysis and comparison of the existing international human rights case law and an assessment of the rules of international humanitarian law and international criminal law applicable to enforced disappearance. The study includes a meticulous review, comparison and analysis of the case law of the international criminal tribunals, the Human Rights Committee, the Inter-American and European Courts of Human Rights and the African Commission on Human and People's Rights. It contains a comparison of the jurisprudence on cases of enforced disappearance with regard to the different aspects of the right to liberty and security, the right to life, the prohibition of torture, the right to be recognized as a person before the law, the right to the truth and the right to privacy and family life. In addition, it reviews the rules that apply to enforced disappearance under international humanitarian law and determines the principles applicable for individual responsibility for the crime of enforced disappearance under international criminal law.

**The War on Kids** Cara H. Drinan 2017-11 In 2003, when Terrence Graham was sixteen, he and three other teens attempted to rob a barbeque restaurant in Jacksonville, Florida. Though they left with no money, and no one was seriously injured, Terrence was sentenced to die in prison for his involvement in that crime. As shocking as Terrence's sentence sounds, it is merely a symptom of contemporary American juvenile justice practices. In the United States, adolescents are routinely transferred out of juvenile court and into adult criminal court without any judicial oversight. Once in adult court, children can be sentenced without regard for their youth. Juveniles are housed in adult correctional facilities, they may be held in solitary confinement, and they experience the highest rates of sexual and physical assault among inmates. Until 2005, children convicted in America's courts were subject to the death penalty; today, they still may be sentenced to die in prison-no matter what efforts they make to rehabilitate themselves. America has waged a war on kids. In *The War on Kids*, Cara Drinan reveals how the United States went from being a pioneer to an international pariah in its juvenile sentencing practices. Academics and journalists have long recognized the failings of juvenile justice practices in this country and have called for change. Despite the uncertain political climate, there is hope that recent Supreme Court decisions may finally make those calls a reality. *The War on Kids* seizes upon this moment of judicial and political recognition that children are different in the eyes of the law. Drinan chronicles the shortcomings of juvenile justice by drawing upon social science, legal decisions, and first-hand correspondence with Terrence and others like him—individuals whose adolescent errors have cost them their lives. At the same time, *The War on Kids* maps out concrete steps that states can take to correct the course of American juvenile justice.

**Victors' Justice** Danilo Zolo 2020-01-28 International tribunals are shown to be little more than a tool of Western imperialism. *Victors' Justice* is a potent and articulate polemic against the manipulation of international penal law by the West, combining historical detail, juridical precision and philosophical analysis. Zolo's key thesis is that contemporary international law functions as a two-track system: a made-to-measure law for the hegemon and their allies, on the one hand, and a punitive regime for the losers and the disadvantaged, on the other. Though it constantly advertised its impartiality and universalism, international law served to bolster and legitimize, ever since the Tokyo and Nuremberg trials, a fundamentally unilateral and unequal international order.

**Education, Policy, and Social Change** Daniel A. Morales-Gómez 1992 This volume examines the links among research, policy, and change in education in Latin America in the context of the relationships among the economy, politics, and the state in the 1980s. The book addresses the following questions: How did education respond during the 1980s to the major sociopolitical and economic changes that affected these countries? How did the changes in the 1980s affect the relationships between education, society, and the state, and what lessons can be learned from the interaction between research and policy that may help in understanding the developmental role of education in the 1990s? And is educational research and policy helping to improve the social condition of minorities in Latin America?

**Our America** José Martí 1977 Presents the celebrated Cuban revolutionary's thoughts on "Nuestra America," the Latin America Martí fought to make free.

**International Handbook of Educational Change** Andy Hargreaves 1998-05-31 The International Handbook of Educational Change is a state of the art collection of the most important ideas and evidence of educational change. The book brings together some of the most influential thinkers and writers on educational change. It deals with issues like educational innovation, reform, restructuring, culture-building, inspection, school-review, and change management. It asks why some people resist change and what their resistance means. It looks at how men and women, older teachers and younger teachers, experience change differently. It looks at the positive aspects of change but does not hesitate to raise uncomfortable questions about many aspects of educational change either. It looks critically and controversially at the social, economic, cultural and political forces that are driving educational change. School leaders, system administration, teacher leaders, consultants, facilitators, educational researchers, staff developers and change agents of all kinds will find this book an indispensable resource for guiding them to both classic and cutting-edge understandings of educational change, no other work provides as comprehensive coverage of the field of educational change.

**The Prosecutor and the Judge** Heikelina Verrijn Stuart 2009 Earlier this year, the Praemium Erasmianum Foundation bestowed its annual award—the Erasmus Prize—on Benjamin Ferencz and Antonio Cassese, two pioneers in the field of international law. Ferencz, a leading American prosecutor, author, and lecturer, was present at the American war crimes trials in Dachau and was the chief prosecutor in the Einsatzgruppen trials in Nuremberg. Like Ferencz, Cassese was a key figure in the development of international criminal law, serving as the first president of the International Criminal Tribunal for the former Yugoslavia and president of the European Committee for the Prevention of Torture, and chairman of the UN Commission of Inquiry into Violation of Human Rights and Humanitarian Law in Darfur. Cassese is currently the president of the Special Court for Lebanon. In *The Prosecutor and the Judge*, Heikelina Verrijn Stuart and Marlise Simons provide in-depth, revealing interviews with these two advocates of international law. Supplementing the interviews are several key articles written by Ferencz and Cassese that highlight the two men's achievements and set the development of international law in context. **Quantitative-Qualitative Friction Ridge Analysis** David R. Ashbaugh 1999-10-27 A thumb print left at the scene of a grisly murder. Fingerprints taken from a getaway car used in a bank robbery. A palm print recovered from the shattered glass door of a burglarized home. Indeed, where crimes are committed, careless perpetrators will invariably leave behind the critical pieces of evidence—most likely in the form of fingerprints—needed to catch and convict them. But the science of fingerprint identification isn't always as cut and dry as detective novels and movies make it out to be. *Quantitative-Qualitative Friction Ridge Analysis*, a new book in the ongoing Practical Aspects of Criminal and Forensic Investigations series, examines the latest methods and techniques in the science of friction ridge identification, or ridgeology. David R. Ashbaugh examines every facet of the discipline, from the history of friction ridge identification and its earliest pioneers and researchers, to the scientific basis and the various steps of the identification process. The structure and growth of friction skin and how it can leave latent or visible prints are examined, as well as advanced identification methods in ridgeology, including Poroscopy, Edgeoscopy, Pressure Distortion and Complex or Problem Print Analysis. The book, which features several detailed illustrations and photographs, also includes a new method for Palmar Flexion Crease Identification (palm lines) designed by the author and which has helped solve several criminal cases where fingerprints were not available. For crime scene technicians, forensic identification specialists, or anyone else pursuing a career in forensic science, this book is arguably the definitive source in the science of friction ridge identification.

**The Answer / La Respuesta (Expanded Edition)** Sor Juana Inés de la Cruz 2009-06-01 Known as the first feminist of the Americas, the Mexican nun Sor Juana Inés de la Cruz enjoyed an international reputation as one of the great lyric poets and dramatists of her time. While earlier translators have ignored Sor Juana's keen awareness of gender, this volume brings out her own emphasis and diction, and reveals the remarkable scholarship, subversiveness, and even humor she drew on in defense of her cause. This expanded, bilingual edition combines new research and perspectives on an inspired writer and thinker. It includes the fully annotated primary text, *The Answer/La Respuesta* (1691), which is Sor Juana's impassioned response to years of attempts by church officials to silence her; the letter that ultimately provoked the writing of *The Answer*; an expanded selection of poems; an updated bibliography; and a new preface.

**Popular Government** Henry Sumner Maine 1886

**Corruption and Post-Conflict Peacebuilding** Dominik Zaum 2012-02-20 This edited volume

explores and evaluates the roles of corruption in post-conflict peacebuilding. The problem of corruption has become increasingly important in war to peace transitions, eroding confidence in new democratic institutions, undermining economic development, diverting scarce public resources, and reducing the delivery of vital social services. Conflict-affected countries offer an ideal environment for pervasive corruption. Their weak administrative institutions and fragile legal and judicial systems mean that they lack the capacity to effectively investigate and punish corrupt behaviour. In addition, the sudden inflow of donor aid into post-conflict countries and the desire of peacebuilding actors (including the UN, the international financial institutions, aid agencies, and non-governmental organisations) to disburse these funds quickly, create incentives and opportunities for corruption. While corruption imposes costs and compromises on peacebuilding efforts, opportunities for exploiting public office can also be used to entice armed groups into signing peace agreements, thus stabilising post-war environments. This book explores the different functions of corruption both conceptually and through the lens of a wide range of case studies. It also examines the impact of key anti-corruption policies on peacebuilding environments. The dynamics that shape the relationship between corruption and the political and economic developments in post-conflict countries are complex. This analysis highlights that fighting corruption is only one of several important peacebuilding objectives, and that due consideration must be given to the specific social and political context in considering how a sustainable peace can be achieved. This book will be of great interest to students of peacekeeping and peacebuilding, criminology, political economy, war and conflict studies, international security and IR.

**Historia mínima de la economía mexicana, 1519-2010** Sandra Kuntz Ficker 2012 Obra accesible, que pone de relieve aspectos del pasado que son de importancia e interés para el mundo de hoy. Ofrece una imagen fresca y desprejuiciada de nuestra historia económica que supera los estereotipos y las ideologías tan comunes en la cultura económica de nuestro país. Sus capítulos se entrelazan para proporcionar continuidad y fluidez al nuevo conjunto. El propósito es ofrecer una mirada general en una versión que resulta apropiada para lectores. Versión sintética del contenido de la Historia económica general de México.

**Documenting Individual Identity** Jane Caplan 2018-06-05 This book addresses one of the least studied yet most pervasive aspects of modern life—the techniques and mechanisms by which official agencies certify individual identity. From passports and identity cards to labor registration and alien documentation, from fingerprinting to much-debated contemporary issues such as DNA-typing, body surveillance, and the catastrophic results of colonial-era identity documentation in postcolonial Rwanda, *Documenting Individual Identity* offers the most comprehensive historical overview of this fascinating topic ever published. The nineteen essays in this volume represent the collaborative effort of historians, sociologists, historians of science, political scientists, economists, and specialists in international relations. Together they cover a period from the emergence of systematic practices of written identification in early modern Europe through to the present day, and a geographic range that includes Europe, the Soviet Union, North and South America, and Africa. While the book is attuned to the nefarious possibilities of states' increasing capacity to identify individuals, it recognizes that these same techniques also certify citizens' eligibility for significant positive rights, such as welfare benefits and voting. Unprecedented in subject and scope, *Documenting Individual Identity* promises to shape a whole new field of research that crosses disciplinary boundaries and is of broad public and academic significance. In addition to the editors, the contributors are Valentin Groebner, Gérard Noiriel, Charles Steinwedel, Marc Garcelon, Jon Agar, Martine Kaluszynski, Peter Becker, Anne Joseph, Kristin Ruggiero, Andrea Geselle, Andreas Fahrmeier, Leo Lucassen, Pamela Sankar, David Lyon, Gary Marx, Dita Vogel, and Timothy Longman.

**Constitutional Theory** Geoffrey Marshall 1980 This book examines the nature and role of the many conventions which, rather than laws, are instrumental in determining many important questions of Government behaviour in Britain and other Commonwealth countries.

**Considerations on Western Marxism** Perry Anderson 2016-02-23 This synoptic essay considers the nature and evolution of the Marxist theory that developed in Western Europe, after the defeat of the proletarian rebellions in the West and the isolation of the Russian Revolution in the East in the early 1920s. It focuses particularly on the work of Lukács, Korsch and Gramsci; Adorno, Marcuse and Benjamin; Sartre and Althusser; and Della Volpe and Colletti, together with other figures within Western Marxism from 1920 to 1975. The theoretical production of each of these thinkers is related simultaneously to the practical fate of working-class struggles and to the cultural mutations of bourgeois thought in their time. The philosophical antecedents of the various school within this tradition—Lukácsian, Gramscian, Frankfurt, Sartrean, Althusserian and Della Volpean—are compared, and the specific innovations of their respective systems surveyed. The structural unity of 'Western Marxism', beyond the diversity of its individual thinkers, is then assessed, in a balance-sheet that contrasts its heritage with the tradition of 'classical' Marxism that preceded it, and with the commanding problems which will confront any historical materialism to succeed it.

**Copyright and Neighbouring Rights** Delia Lipszyc 1999 Designed for university courses on copyright, this manual is a major contribution to the study of this legal discipline. Topics covered include the subject matter and content of copyright; owners of copyright; duration of protection; transfer; neighbouring rights; collective administration of copyright; bodies set up to defend copyright; international law.
