**Solidification and Crystallization** Dieter M. Herlach  
2006-03-06 Current interest in research of solidification of melts is focussed to understand crystal nucleation and crystal growth. They determine the solidified product with its physical properties. A detailed description of these processes lead to the development and validation of physical models, which may form the basis of quantitative modelling of solidification routes in e.g. casting and foundry processes in order to develop a predictive capability in the design of materials during solidification. This book, based on a symposium held at EUROMAT 2003 aims to gives an overview on current developments in the research of solidification and crystallisation of liquids. The materials of interest range from metals and their alloys over semiconductors and isolators to organic substances.

**Urbanisation in India** Isher Judge Ahluwalia 2014-02-04 Urban areas are integral to India's growth and development, accounting for around two-thirds of the country's GDP. Analysing India's rapidly expanding process of urbanisation, the book identifies the key challenges and opportunities and proposes suitable managerial and policy reforms. It addresses critical issues and puts forth suggestions for better planning financing alternatives and, most importantly, better governance for improved service delivery and affordable housing. Divided thematically into three sections, the volume takes into account the important facets of urbanisation, including the state of urban infrastructure and

planning in India with due attention to sustainability, the role of finance in urban development and its dependence on governance, and methods to generate good governance in public institutions, and the impact on housing and climate change. The 11 essays included in this book have been written by leading analysts and practitioners, who propose critical reforms and policy interventions. The volume will be indispensable to students and scholars of urban economics, development studies, urban planning, business practitioners, policymakers as well as the informed general reader.

**Sevasadan** Munshi Premchand 2017-01-11 'Sevasadan' is one of the most representative novels of Munshi Premchand. Soon after it was published, the novel kicked up national debates on such

pertinent social issues as prostitution and the place of women in the Indian society. Social taboos dominated the scenario as much as reformers' zeal to tight the rot in the social value system. The story oscillates round a glamour-struck young girl's life. who was brought up with utmost love and care but whose father had to suffer ignominy at the hands of his adversaries for taking a once-in-lifetime bribe and being jailed for that. Her prospective engagement was broken because her mother, now made a destitute with her daughters, failed to meet the demand of dowry from the bridegroom's family. Hapless and stranded, she. along with her mother and sibling sister, was under care of her maternal-uncle. gets married to a middle-aged pauper and pushed to life-long poverty. She failed to get what she had been dreaming for since her childhood. She fought continual battles between aspiration for a respected prosperous lifestyle, and the existing value system which forced her to live with poverty. By the turns of events she ends up into a life of a tawaif, hatefully tries to come out of the nuisance but the irony of fate makes her the centre-point of all debates on how prostitutes could be rescued and rehabilitated. 'Sevasadan' exposes the time Premchand lived in. It also reflects how seriously the author had waged a battle, which is being fought in the Indian society even today.

Charisma of Navamsha - Composite Vedic and Nadi Approach Raj Kumar Among various Varghas, the relative importance of

Navamsha is universally acclaimed. Astrologers consider it to be just next to birth chart or equal to birth chart or even better than the birth chart. Almost all astrologers use Navamsha and birth chart together to assess strengths of various houses and planets before giving any opinion. In Vedic astrology, Navamsha occupies an outstanding position and draws one's attention for deeper understanding/ scrutiny due to its multifarious technique and usage. The additional inputs in the form of scintillating concepts by Jaimini and Nadi system have made the subject more engrossing. The author has tried to incorporate the same in the book. The study of a birth chart gives only the gross (Sthool) indications of characteristics of various houses and planets; while Navamsha offers their detailed (Sookshmatar) values. It is so because a Navamsha is basically equal to both in its size and extent to a quarter/ one fourth / pada of a Nakshtra, thereby giving it a stellar role. While a house represents a combined spectrum of 30 degrees, a Navamsha provides a microscopic view

of 3° 20' or 1/ 9 part of a sign only.

**Phenolic Compound Biochemistry** Wilfred Vermerris 2007-02-20 These are just a few examples that illustrate the chemical diversity and use of phenolic compounds, the topic of 'Phenolic Compound Biochemistry'. This book is written for researchers, instructors, advanced undergraduate students and beginning graduate students in the life sciences who wish to become more familiar with these and many other intriguing aspects of phenolic compounds. Topics covered include nomenclature, chemical properties, biosynthesis, including an up-to-date overview of the genetics controlling phenolic metabolism, isolation and characterization of phenolic compounds, phenolics used in plant defense, and the impact of phenolics on human health. The book is written in an accessible style, and assumes only basic knowledge of organic chemistry, biochemistry and cell

physiology. More than 300 chemical structures and reaction schemes illustrate the text. Wilfred Vermerris is Associate Professor of Agronomy at the University of Florida Genetics Institute in Gainesville, FL. His research focuses on the genetic control of phenolic compounds that impact agro-industrial processing of crop plants. Ralph Nicholson is Professor of Botany and Plant Pathology at Purdue University in West Lafayette, IN. He is an expert on phenolic compounds involved in the plant's defense against pathogenic fungi and bacteria.

Innovations in Bio-Inspired Computing and Applications Ajith Abraham 2019-05-21 This book highlights recent research on bio-inspired computing and its various innovative applications in Information and Communication Technologies. It presents 50 high-quality papers from the 9th International Conference on Innovations in Bio-Inspired Computing and Applications (IBICA 2018) and 7th World Congress on Information and Communication Technologies (WICT 2018), which was held at TCH Institute of Science and Technology (TIST) on December 17-19, 2018. IBICA-WICT 2018 was a premier conference and brought together researchers, engineers and practitioners whose work involved bio-inspired computing, computational intelligence and their applications in information security, real-world contexts etc. Including contributions by authors from 22 countries, the book offers a valuable reference guide for all researchers, students and practitioners in the fields of Computer Science and Engineering.

*Daring to Dream* Neera Kashyap 2004-10-01 The unending stress and tension of examinations and the continuous pressure to do well, the pain of a poor performance the clash between old rituals and new rational ideas that negate them, the still existing bias towards the girl child, the myriad aspirations in life, strain in a strong friendship... these touch upon many such aspects of life. And though the questions raised are serious, the answers come through most simple experiences - emphasising that love, trust,

honesty and hard work make life joyous and pleasurable.

Sardar- The Sovereign Saint Dinkar Joshi 2014-01-01 Without wasting time on any further questions, Shankar dialled the telephone number of the Prime Minister's residence. Unfortunately, the Prime Minister had left for the radio station. Shankar rushed back to give the message to Sardar. Sardar impatiently said : "Shankar, leave immediately for the Radio Station. Go quickly. Try to hold back the Prime Minister's speech. By no means should the matter related to plebiscite and UNO be relayed. If this happens, the whole country will be put into a great trouble. If need be, cancel this programme. Please leave

immediately." Having waded through the traffic on the way, Shankar reached finally to the radio station but he was late. The Prime Minister was reading his speech on the microphone. Shankar heard him referring to the plebiscite and UNO. The whole world was listening to it. Shankar banged his head.
