Unconventional Anthroponyms Oliviu Felecan 2014-10-02 Unconventional Anthroponyms: Formation Patterns and Discursive Function continues a series of collective volumes comprising studies on onomastics, edited by Oliviu Felecan with Cambridge Scholars Publishing. Previous titles in this series include Name and Naming: Synchronic and Diachronic Perspectives (2012) and Onomastics in Contemporary Public Space (2013, co-edited with Alina BugheȚiu). In contemporary naming practice, one can distinguish two verbal (linguistic) means of nominal referential identification: a “natural” one, which occurs in the process of conventional, official, canonical, standard naming and results in conventional/official/canonical/standard anthroponyms; a “motivated” one, which occurs in the process of unconventional, unofficial, uncanonical, non-standard naming and results in

unconventional/unofficial/uncanonical/non-standard anthroponyms. The significance of an official name is arbitrary, conventional, unmotivated, occasional and circumstantial, as names are not likely to carry any intrinsic meaning; names are given by third parties (parents, godparents, other relatives and so on) with the intention to individualise (to differentiate from other individuals). Any meaning with which a name might be endowed should be credited to the name giver: s/he assigns several potential interpretations to the phonetic form of choice, based on his/her aesthetic and cultural options and other kinds of tastes, which are manifested at a certain time. Unconventional anthroponyms (nicknames, bynames, user names, pseudonyms, hypocoristics, individual and group appellatives that undergo anthroponymisation) are nominal “derivatives” that result from a name giver’s wish to attach a specifying/defining verbal (linguistic) tag to a certain individual. An unconventional anthroponym is a person’s singular signum, which may convey a practical necessity (to avoid anthroponymic homonymy: the existence of several bearers for a particular name) or the intention to qualify a certain human type (to underline specific difference – in this case, the unconventional anthroponym has an over-individualising role – or, on the contrary, to mark an individual’s belonging to a class, his/her association with other individuals with whom s/he is typologically related – see the case of generic unconventional anthroponyms).

Marcel Duchamp Staatsgalerie Stuttgart 2019-02-05 Celebrating Marcel Duchamp’s revolutionary contributions to modern art, this innovative exploration of the Stuttgart Duchamp Collection and the Archive of Serge Stauffer offers new insights into both artists’ philosophies. As the inventor of the Readymade and a founder of conceptual art, Marcel Duchamp’s work is still provoking important discussions about what defines art. Accompanying the first exhibition of the important Stuttgart Duchamp Collection, this book also presents the work of the Swiss artist and educator Serge Stauffer and his renowned research on Duchamp’s art and writings. The series of 100 questions Stauffer wrote to the French artist in 1960-and Duchamp’s answers-provide important insights into Duchamp’s intellectual and creative practice and bear witness to the depth of Stauffer’s exceptional research. This book opens with an introduction to the relationship between Duchamp and Stauffer. It features brilliant reproductions of Duchamp’s most renowned works, including Bottlerack, the painting study for Chocolate Grinder, No 2, and the window object La Bagarre d’Austerlitz. A biographical essay on both Duchamp and Stauffer provides important background to understanding the exceptional relationship between both artists.

The Questions of Tenure Richard P. Chait 2005-02-01 Tenure is the abortion issue of the academy, igniting arguments and inflaming near-religious passions. To some, tenure is essential to academic freedom and a magnet to recruit and retain top-flight faculty. To others, it is an impediment to professorial accountability and a constraint on institutional flexibility and finances. But beyond anecdote and opinion, what do we really know about how tenure works? In this unique book, Richard Chait and his colleagues offer the results of their research on key empirical questions. Are there circumstances under which faculty might voluntarily relinquish tenure? When might new faculty

actually prefer non-tenure track positions? Does the absence of tenure mean the absence of shared governance? Why have some colleges abandoned tenure while others have adopted it? Answers to these and other questions come from careful studies of institutions that mirror the American academy: research universities and liberal arts colleges, including both highly selective and less prestigious schools. Lucid and straightforward, The Questions of Tenure offers vivid pictures of academic subcultures. Chait and his colleagues conclude that context counts so much that no single tenure system exists. Still, since no academic reward carries the cachet of tenure, few institutions will initiate significant changes without either powerful external pressures or persistent demands from new or disgruntled faculty.

The Preservation of Antiquities Friedrich Rathgen 2013-03-21 Friedrich Rathgen (1862-1942) was a German chemist who made a profound contribution to the development of conservation science. First published in 1905, this book contains an English translation of Rathgen’s 1898 work Die Konservierung von Altertumsfunden, the first comprehensive text on the subject of archaeological conservation. The book is divided into two parts: part one is concerned with the changes undergone by antiquities in earth and air; part two discusses the treatment of antiquities, with examples of various methods used for conservation. Numerous illustrative figures and a bibliography are also provided. This book will be of value to anyone with an interest in conservation science and archaeology.

Test Construction and Validation Ildikó Hock 2003 This book offers a methodological framework for constructing and validating large-scale testing systems and fills this framework through an account of the construction and validation of one specific testing system, which relies on the construct of communicative language ability in the specific context of classroom teaching. The test is called the Test of English for Teaching Purposes (TETP) and it has been developed to assess the engagement of test takers’ language proficiency in test tasks which they are likely to encounter outside the testing situation. The book handles prominent issues of the construction and validation of this test. The content is organized into three main parts. Part One presents the results of a baseline study whose focal point is the identification through empirical research of the domain in which EFL teachers use the language when they are at work. This description provides the basis for the definition of the construct of English for Teaching Purposes and, ther

Names in the Economy Terhi Ainiala 2014-07-18 The economy has an increasingly powerful role in the contemporary global world. Academic scholars who study names have recognised this, and, as such, onomastic research has expanded from personal and place names towards names that reflect the new commercial culture. Companies are aware of the significance of naming. Brand, product and company names play an important role in business.

Culture produces names and names produce culture. Commercial names shape cultures, on the one hand, and changes in cultures may affect commercial names on the other. The world of the economy and business has created its own culture of names, but this naming culture may also affect other names; even place names and personal names are influenced by it. Names in the Economy: Cultural Prospects is composed of 20 articles that were produced from a collection of papers presented in 2012 at the fourth Names in the Economy symposium in Turku, Finland. These articles will equally be of interest to both academics and professionals. The goal of this book is multidisciplinary and theoretically diverse: it contemplates commercial-bound names from the viewpoints of linguistics and onomastics, as well as marketing and branding research. In addition to traditional onomastic standpoints, there are newer linguistic theories, sociological and communicational views, multimodality theory, and branding theories. The authors are scholars from three continents and from ten different countries.

Project 3 David Newbold 2000 Project brings English to life through motivating topics within a structured learning environment. It provides a clearly-structured, supportive framework of grammar with the flexibility to allow students to make their own discoveries. Language is presented in stimulating, realistic contexts. A high profile is given to skills development from the start of the course. Cross-curricular project work encourages students to communicate in English about their own lives and experiences. The strong cultural element helps students to establish a connection between language and life. Students are encouraged to learn about life in Britain and other English-speaking countries, as well as to explore differences and draw comparisons with their own cultures. Strong emphasis is placed on learner independence: students are encouraged to think about their own learning and reflect on their progress. The course is enriched by numerous songs, games, and puzzles which make language learning fun. The fifth level, Project Plus, is a revision level with the emphasis on skills extension, in particular reading and speaking.
