Now with a new foreword by Stephanie Kelton, economic advisor to Bernie Sanders’s presidential campaign, this smart and essential book cuts to the very core of our nation’s broken social contracts and the challenges we face in our divided, unequal society.

Reading Walter de la Mare Walter de la Mare 2021-06-15 Walter de la Mare (1873-1956) was one of the best-loved English poets of the twentieth century, his verse admired by contemporaries including Thomas Hardy, Robert Frost, W. H. Auden and T. S. Eliot. This volume presents a new selection of de la Mare’s finest poems, including perennial favourites such as ‘Napoleon’, ‘Fare Well’ and ‘The Listeners’, for a twenty-first-century audience. The poems are accompanied by commentaries by William Wootten, which build up a portrait of de la Mare’s life, loves and friendships with the likes of Hardy, Rupert Brooke, Edward Thomas and Katherine Mansfield. They also point out the fascinating references to literature, folklore and the natural world that embroider the verse.

I Love You, Mum - I Promise I Won't Die Mark Wheeler 2017-02-09 I'd had a conversation specifically with Dan about ecstasy. It's one of the things you do as a parent, isn't it? Wear your helmet when you're out on your bike, you know, don't take drugs. To be honest, I was more worried about him being safe on his bike than at a party with his friends. The words of the title are the last ones spoken by sixteen-year-old Daniel Spargo-Mabbs to his mother. One evening in January 2014, Daniel's parents thought he was going to a friend's house. He actually attended an illegal rave and later died after taking MDMA. That fateful evening is told through the words of his school friends and family, divided into two hard-hitting acts in Mark Wheeler's verbatim play. *I Love You, Mum - I Promise I Won't Die* was commissioned by the charity set up in Daniel's memory to raise awareness about the danger of party drugs. It is a fast-paced, tragic, vibrant piece of verbatim theatre, which should engage teenage readers, audiences and performers alike.

Video Processing in the Cloud Rafael Silva Pereira 2011-08-22 As computer systems evolve, the volume of data to be processed increases significantly, either as a consequence of the expanding amount of available information, or due to the possibility of performing highly complex operations that were not feasible in the past. Nevertheless, tasks that depend on the manipulation of large amounts of information are still performed at large computational cost, i.e., either the processing time will be large, or they will require intensive use of computer resources. In this scenario, the efficient use of available computational resources is paramount, and creates a demand for systems that can optimize the use of resources in relation to the amount of data to be processed. This problem becomes increasingly critical when the volume of information to be processed is variable, i.e., there is a seasonal variation of demand. Such demand variations are caused by a variety of factors, such as an unanticipated burst of client requests, a time-critical simulation, or high volumes of simultaneous video uploads, e.g. as a consequence of a public contest. In these cases, there are moments when the demand is very low (resources are almost idle) while, conversely, at other moments, the processing demand exceeds the resources capacity. Moreover, from an economical perspective, seasonal demands do not justify a massive investment in infrastructure, just to provide enough computing power for peak situations. In this light, the ability to build adaptive systems, capable of using on demand resources provided by Cloud Computing infrastructures is very attractive.

Making Meaning in English David Didau 2021-02-10 What is English as a school subject for? What does knowledge look like in English and what should be taught? Making Meaning in English examines the broader purpose and reasons for teaching English and explores what knowledge looks like in a subject concerned with judgement, interpretation and value. David Didau argues that the content of English is best explored through distinct disciplinary lenses – metaphor, story, argument, pattern, grammar and context – and considers the knowledge that needs to be explicitly taught so students can recognise, transfer, build and extend their knowledge of English. He discusses the principles and tools we can use to make decisions about what to teach and offers a curriculum framework that draws these strands together to allow students to make sense of the knowledge they encounter. If students are going to enjoy English as a subject and do well in it, they not only need to be knowledgeable, but understand how to use their knowledge to create meaning. This insightful text offers a practical way for teachers to construct a curriculum in which the mastery of English can be planned, taught and assessed.

Handbook of Mobile Learning Zane L. Berge 2013-06-19 Winner of the AECT Division of Distance Learning (DDL) Distance Education Book Award! This handbook provides a comprehensive compendium of research in all aspects of mobile learning, one of the most significant ongoing global developments in the entire field of education. Rather than focus on specific technologies, expert authors discuss how best to utilize technology in the service of improving teaching and learning. For more than a decade, researchers and practitioners have been exploring this area of study as the growing popularity of smartphones, tablets, and other such devices, as well as the increasingly sophisticated applications for these devices, has allowed educators to accommodate and support an increasingly mobile society. This handbook provides the first authoritative account of the theory and research that underlies mobile learning, while also exemplifying models of current and future practice.

The Differentiated Classroom Carol Ann Tomlinson 2014-05-25 Although much has changed in schools in recent years, the power of differentiated instruction remains the same—and the need for it has only increased. Today's classroom is more diverse, more inclusive, and more plugged into technology than ever before. And it's led by teachers under enormous pressure to help decidedly unstandardized students meet an expanding set of rigorous, standardized learning targets. In this updated second edition of her best-selling classic work, Carol Ann Tomlinson offers these teachers a powerful and practical way to meet a challenge that is both very modern and completely timeless: how to divide their time, resources, and efforts to effectively instruct so many students of various backgrounds, readiness and skill levels, and interests. With a perspective informed by advances in research and deepened by more than 15 years of implementation feedback in all types of schools, Tomlinson explains the theoretical basis of differentiated instruction, explores the variables of curriculum and learning environment, shares dozens of instructional strategies, and then goes inside elementary and secondary classrooms in nearly all subject areas to illustrate how real teachers are applying differentiation principles and strategies to respond to the needs of all learners. This book's insightful guidance on what to differentiate, how to differentiate, and why lays the groundwork for bringing differentiated instruction into your own classroom or refining the work you already do to help each of your wonderfully unique learners move toward greater knowledge, more advanced skills, and expanded understanding. Today more than ever, *The Differentiated Classroom* is a must-have staple for every teacher's shelf and every school's professional development collection.

Rapture Carol Ann Duffy 2016-05-03 Winner of the T. S. Eliot Prize, "essential reading for the broken-hearted of all ages" (The Guardian) The effortless virtuosity, drama, and humanity of Carol Ann Duffy's verse have made her much admired among contemporary poets. Rapture is a book-length love poem and a moving act of personal testimony. But what sets these poems apart from other treatments of the subject is Duffy's refusal to simplify the contradictions of love and read its transformations-infatuation, longing, passion, commitment, rancor, separation, and grief-as either redemptive or destructive. This is a map of real love in all its churning complexity, simultaneously direct and subtle, showing us that a song can be made of even the most painful episodes in our lives. With poems that will find deep resonance in the experience of most readers, it is a collection that can and does speak for us all.
